

## Pearlex Painting

Pat Smothers

patnmike82@insightbb.com

Stamp and emboss image using black pigment ink and black powder on black card stock. Use Dove blender pen or waterbrush filled with Dove blending medium to paint PearlEx colors of your choice over the image.

Dip the waterbrush tip right into the jar of PearlEx and then paint. The PearlEx fills in the non-embossed areas. You may also use clear embossing ink and clear embossing powder on white or lighter colors of card stock and proceed as above with the PearlEx. (I prefer to seal with a spray sealer though some may not consider it necessary.)
