

White Outlines

Gingerstamp

Gingerwood@gingerstamp.com

1. Emboss your image onto white cardstock, using clear embossing powder and clear ink.
2. Color wash your image with watercolors, Twinkling H2O's, markers, whatever you want to use. I would not recommend colored pencils. I would suggest using medium to dark colors. Just sling that color on baby!
3. Lay a piece of printer paper on top of the image after your colors have dried and iron it. The printer paper will pick up the embossing, leaving you with just the white outlines of the white cardstock that was protected from the colorwash.
